

Aloe Body Toner

Description and Purpose

This thick and rich emollient cream will give your skin a warm, stimulated feeling. Aloe Body Toner contains stabilised aloe vera gel, emulsifiers, moisturisers and humectants, together with the circulatory and warming agents, cinnamon oil and capsicum.

Aloe Body Toner is formulated for use with the cellophane wrap, to hold in heat and smooth body surfaces. It is a specially-prepared cream, designed for use in beautifying the body by toning and firming it. The effectiveness of the cream on the texture of the skin is due to the choice of ingredients used, and the massaging and wrap-action applied. The ingredients chosen provide a rich, warming and soothing action. The herbal extracts, imported from Europe, are known for their shaping and toning characteristics. The natural moisturisation and beautifying effects of nature's aloe vera and herbal extracts, together with the skin-reddening properties of natural capsicum and cinnamon oil provide an effective product.

At a glance...

- Beautifies body while toning and firming
- Moisturises and conditions the skin with a superb combination of herbal complexes
- A deep-heating emollient cream, to shape and tone the skin
- Formulated to be used with plastic wrap
