

Aloe Deep Moisturizing Cream

Description and Purpose

Aloe Deep Moisturizing Cream with pine bark extract is the newest addition to our outstanding Sonya Skin Care range. This deep moisturising cream quenches your skin's thirst for moisture like never before.

Pine bark extract contains natural substances called OPCs (Oligomeric Proanthocyanidins) which have some of the strongest antioxidant properties ever found in nature. As a result, pine bark extract combats free radicals to help preserve and strengthen the skin's collagen, which is the most abundant protein in the body.

Combating free radicals is considered by scientists to be one of the best ways to counteract the signs of ageing. Pine bark extract in combination with the pure, stabilised aloe vera, ceramides, and latest-generation moisturisers in our new Aloe Deep Moisturising Cream, helps maintain and deliver moisture deep within the outer layers of the skin to restore and preserve the skin's youthful glow.

At a glance...

- Extra hydrating, for even the driest of skin
- Contains pine bark extract to combat free radicals
- Helps to restore and preserve the skin's youthful glow

Contents

71g (2.5oz).

Directions

For intense, deep moisturising in the evening, use after Aloe Nourishing Serum. Remove plastic scoop and disc underneath lid of jar. Using the scoop, remove several scoops of cream from jar and place in jar disc. Using fingertips, apply cream from jar disc to face and neck, then massage into skin. Rinse scoop and disc thoroughly with hot water after each use and dry with a clean towel before replacing underneath lid on jar for future use.
