

# R<sup>3</sup> Factor Skin Defence Creme

## Description and Purpose

Help your skin RETAIN its natural moisture, RESTORE its resilience and RENEW its appearance with R<sup>3</sup> Factor Skin Defence Creme – a rich combination of stabilised aloe vera gel, soluble collagen and alpha-hydroxy acids, fortified with vitamins A and E, each vital to healthy skin. Vitamin E is a powerful antioxidant, while vitamin A helps with the maintenance of healthy skin and is beneficial to many skin conditions.

Alpha Hydroxy Acids (AHAs) come from natural plant sources and are also called fruit acids. Together, these fruit acids acts as exfoliants that loosen dead cells from the skin's surface by dissolving the natural glue-like substances that bond the dead skin cells. These cells create a barrier to moisturising creams - getting rid of these dead cells evenly means that fresher cells are exposed in the skin's renewal process. Since it takes 21-28 days for the skin renewal process to complete a cycle, allow a similar amount of time to realise the full benefits of R<sup>3</sup> Factor.

Fruit acid creams have been called the most important skin care agents of the decade. By combining AHAs with soothing aloe, R<sup>3</sup> Factor Skin Defence Creme provides a first line of defence in fighting the effects of time to preserve your skin's youthful appearance.
