

Forever Active Pro-B™

#610

Forever Active Pro-B™ Support Your Digestive System

Support your body like never before with the latest in scientific advancements and new, clinically studied probiotic strains. Designed to promote a healthy digestive system, Forever Active Pro-B™ includes FloraActive—a range of beneficial probiotic strains from Copenhagen University Hospital, a leader in the gastroenterology field.

With a proprietary blend of 6 different strains, Forever Active Pro-B™ probiotic provides 8 billion CFU per dose. These strains were researched and selected based on their beneficial properties, clinical research and their ability to work synergistically. This formula also includes a prebiotic fiber to sustain the probiotics during storage, transport and delivery to the gut.

Prebiotics provide the ideal environment for the probiotic to function and thrive. The prebiotic fiber selected is a short chain fructo-oligosaccharide that is known to support fermentation of the healthy bacteria used in the Forever Active Pro-B™ formula.

We added zinc to the formula to provide another layer of support for your immunity. Studies show that zinc promotes a healthy immunity and supports metabolism function. Give your body advanced digestive support with clinically-studied ingredients when you choose Forever Active Pro-B™!
