DAYS 3 THROUGH 9

Time to step it up! Now that you are consuming more calories, you should feel more energized and ready to take on more physical activity. During this part of CLEAN 9, your focus should be on calorie-burning aerobic exercises like the examples below. Studies show that aerobic activities like running or dancing burn more calories than other forms of exercise.

LOW-MEDIUM IMPACT EXERCISES

+ BIKE RIDE
+ BRISK WALK
+ SWIMMING
+ WATER AEROBICS
+ YOGA
+ ELLIPTICAL MACHINE
+ STEP AEROBICS
+ HIKING
+ ROCK CLIMBING
+ DANCING
+ ROLLERBLADING
+ TREADMILL
+ STRETCHING

* You should check with a physician if you have debilitating fatigue lasting more than a few hours or notice any symptoms that might require medical attention during this program.

EXERCISE OPTIONS.

DAYS 1&2

You’ll be consuming a diet very low in calories for the first two days. Because of this, you may feel like you have less energy than usual. This is normal and usually nothing to be concerned about.*

How much is enough? It’s important to engage in 30 minutes of aerobic exercise every day.

While getting some exercise is important, it’s best to keep it to low and moderate impact exercises during this phase of CLEAN 9. Take a 30 minute walk at a slow to moderate pace, engage in some gentle stretching exercises, or take a low-key yoga class designed for beginners. These activities will not only stimulate your metabolism, they will also help you stay centered and calm as you begin your transformation.

While you can break this up into two 15 minute sessions, it’s best to exercise for a full 30 minutes to put your body into a fat-burning zone.

Be sure to take 2 minutes to stretch and 5 minutes to warm up before completing your 30 minutes of exercises. Preparing your body and muscles ensures that you get the most out of your workout and have a faster recovery.

There are many opportunities to burn extra calories throughout the day. Instead of the elevator, take the stairs, or park further away from your destination and walk.

YOUR DAILY PLANNER.

Research shows that people who record what they eat and how much they exercise lose more weight. Indeed, those that keep a daily planner are two to three times more likely to stick with the program.

Keep track of how your body is improving by weighing yourself at the beginning and end of the program.

Document any extra food you eat, the type of exercise you do each day, how well you sleep and how you feel.

Not only will this give you a great overview of your progress, it will also provide a good reference later on as you continue your health and weight-loss journey.

**DAY 9 DONE! YOU DID IT!**
FREQUENTLY ASKED QUESTIONS.

HOW MUCH WEIGHT CAN I EXPECT TO LOSE ON CLEAN 9?
The amount of weight you will lose during the CLEAN 9 program depends on your baseline factors including your starting weight and what your lifestyle was like when you began the program.

IS THE CLEAN 9 PROGRAM SAFE?
Yes. Because the program is designed to be done for nine days only, it is extremely safe for most people. However, if you have a pre-existing health condition or are under a doctor’s care, it’s wise to consult with them before starting CLEAN 9 or any weight management program.

WILL I FEEL HUNGRY DURING CLEAN 9?
You may feel hungry, especially during the first two days. This is normal. However, the sensation of hunger should subside. Forever Fiber® and Forever Lite Ultra® are designed to support feelings of fullness and help stave off hunger.*

THE FIRST TWO DAYS OF THE PROGRAM LOOK TOUGH! DO I HAVE TO FOLLOW THEM EXACTLY AS OUTLINED?
Yes. CLEAN 9 is specifically designed to jumpstart a healthy weight management program and help eliminate some of the toxins that can negatively impact your overall health. These first two days help reset your body’s ability to detoxify and set the stage for Days 3 through 9. Skipping Days 1 and 2 can impact your final results during this phase of the program.

WHAT DOES FOREVER GARCINIA PLUS® DO?
Garcinia cambogia is a small, pumpkin-shaped fruit that contains a compound known as hydroxycitric acid (HCA). Studies show that HCA helps to support a healthy weight when used in conjunction with a healthful diet and exercise program. Specifically, Garcinia may help the body burn fat more efficiently. It may also help suppress your appetite by increasing serotonin levels.*

WHAT ARE THE BENEFITS OF FOREVER THERM®?
Forever Therm® offers a powerful combination of botanical extracts and vitamins that can help support metabolism by boosting thermogenesis.*

WHY DO I NEED PROTEIN?
Protein is the basic building block of every cell in your body. In order to build or repair tissues and muscles, your body needs amino acids that can only be derived from protein. Research shows that protein is essential for successful weight-loss. Calorie restriction that does not include adequate amounts of protein can cause a loss of muscle mass before you begin to lose fat. Forever Lite Ultra®, when combined with a healthful diet and exercise program, can help you lose fat, not muscle.*

WHY SHOULD I DRINK AT LEAST 8 GLASSES OF WATER PER DAY?
About 72% of your body is made up of water, and you must constantly replenish this supply. Water is needed to maintain a healthy metabolism, because it is involved in almost every biochemical process in your body. Making sure you are well-hydrated also helps to keep you feeling full between meals.

AS LONG AS I MONITOR MY CALORIE INTAKE TO STAY WITHIN THE CLEAN 9 PROGRAM, CAN I EAT WHATSOEVER FOODS I WANT?
One of the most important parts of changing your body is changing the way you think about food. For best results, we suggest that you follow the program exactly as outlined in this booklet. Foods that are low in calories may not provide you with the correct balance of nutrients necessary for cleansing and weight-loss.
