

# Forever Active Pro-B™

## Support your digestive system

- Promotes a healthy digestive system
- Able to bypass stomach acid for optimal delivery within the intestines
- Contains 6 synergistic strains including clinically studied Lactobacillus rhamnosus
- Over 8 billion CFU
- Strains freeze dried for protection, potency and shelf stability
- Soy and allergen-free

Support your body like never before with the latest in scientific advancements and new, clinically studied probiotic strains. Designed to promote a healthy digestive system, Forever Active Pro-B™ includes FloraActive—a range of beneficial probiotic strains from Copenhagen University Hospital, a leader in the gastroenterology field. With a proprietary blend of 6 different strains, Forever Active Pro-B™ provides 8 billion CFU per dose. These strains were researched and selected based on their beneficial properties, clinical research and their ability to work synergistically.

This formula also includes a prebiotic fiber to sustain the probiotics during storage, transport and delivery to the gut. Prebiotics provide the ideal environment for the probiotic to function and thrive. The prebiotic fiber selected is a short chain fructo-oligosaccharide that is known to support fermentation of bifidobacteria and lactobacillus species used in the Forever Active Pro-B™ formula.

### Supplement Facts

Serving Size 1 Capsule  
Servings Per Container 30

Amount Per Serving	% DV
Proprietary Probiotic Blend	8 billion CFU *
B. lactis, L. rhamnosus, L. reuteri, L. acidophilus, B. longum, B. bifidum	

\* Daily Value (DV) not established.

**Other Ingredients:** Corn dextrin, hydroxypropyl methylcellulose, fructooligosaccharides, magnesium stearate, silicon dioxide and titanium dioxide.

### CONTENTS

30 Capsules

### SUGGESTED USE

Take one capsule daily with water.

### NOTE

For best results, do not store at temperatures above 77degrees F(25 degrees c).

# Forever Active Pro-B™

## Support your digestive system

Just one capsule per day can help overcome imbalances created by our food and busy lifestyle choices, which can inadvertently lead to a reduction in the amount of naturally occurring probiotics. Forever Active Pro-B™ works primarily in the intestines where it assists with the process of food digestion, helping to release nutrients for absorption and contributes positively to normal human growth and development by helping to maintain a balanced and healthy immune and digestive system.

Forever Active Pro-B™ is a vegetarian capsule packaged in a unique vial that uses Activ Vial Technology™. This new packaging includes an engineered desiccant sleeve built into the bottle to control moisture absorption and protect the probiotics throughout their shelf-life.

As probiotics themselves are quite fragile, Forever Active Pro-B™ uses an exclusive, cryo protection technology that protects the probiotics during manufacture and throughout shelf-life. The strains in Forever Active Pro-B™ have been selected and engineered to have high resistance to stomach acid and bile salts allowing them to reach the intestine. Clinical studies have shown these strains have a greater ability to colonize and proliferate and survive the passage of the GI Tract.

The probiotics in Forever Active Pro-B™ are derived from Lactobacillus and Bifidobacterium genera; the species are:

Bifidobacterium lactis  
Lactobacillus rhamnosus  
Lactobacillus reuteri  
Lactobacillus acidophilus  
Bifidobacterium longum  
Bifidobacterium B-bifidim

Forever Active Pro-B™ is a shelf-stable, 6-strain probiotic that requires no refrigeration. And, what's great about Forever Active Pro-B™ is that it works in tandem with our patented aloe vera, which acts as a prebiotic. Whether your goal is to promote a healthy digestive system or enhance nutrient absorption and immune function, add Forever Active Pro-B™ to your daily supplement program.
