

Sonya

Sonya® Aloe Mineral Makeup

Sonya® Aloe Mineral Makeup glides on like a dream, evening out your complexion, minimizing pores, and giving skin a luminous glow. Acting as a concealer, foundation and powder all in one, this multi-tasking powder seamlessly blends and gives an ultimately natural-looking skin finish.

The pigments in Sonya Aloe Mineral Makeup are micronized to produce the smoothest-feeling particle size possible. These powders are so smooth that they glide on like a cream but stay on like a powder. The micronization process dramatically improves the feel and blend-ability of Sonya Aloe Mineral Makeup and increases its wear.

Sonya Aloe Mineral Makeup includes the following key ingredients and functions:

Micronization Technology provides the smoothest-feeling particle size possible without worrying about nanoparticles; gives true, long-lasting application; no pulling - powders literally glide on skin; will not crease or fade; allows the application

to last all day without fading or running; glides smoothly across skin for even application and color balance.

Zinc Oxide and Titanium Dioxide together these provide a translucent, natural-looking base

Bismuth Oxochloride a natural mineral that gives skin a luminous glow

Aloe Vera Oil Extract offers excellent soothing and calming effects to the skin; a cellular nutrient; promotes skin hydration; carrier of vitamins and other age-defying nutrients; aids in the restoration of proper moisture levels.

Vitamin E anti-oxidant vitamin; helps to increase skin's elasticity; a natural moisture binder that allows the skin to breathe and function naturally; maintains moisture levels of the skin for long periods of time and helps to prevent free radical damage in the skin tissues.

- Long lasting, will not streak or fade
- Silky soft, smooth texture
- Easy to apply, blends evenly and easily
